Recommendations for Assessment Tools that can be helpful to comply with SACS:

- **Direct assessment that can be done:**

  State the number of circulations in and out of the library, number of books being used daily or checked out. State the number of tours that the Library puts on for new students. But overall, the Library needs to be more than just holding books for students. They need to create seminar that teach students how to use the resources available in the facility and demonstrate its use in their study of law.

- **Indirect assessment that can be done:**

  Survey students that take a tour of the Library and survey each student that takes a class that shows the use of the Library for researching for homework.

**Tools recommended for assessment:**

Surveys from all parties involved: staff, students and faculty to show for more data. For staff, on how they facilitate the student learning experience. For students, to get more data on student learning outcome. For faculty, to see if it benefits their research, publishing and teaching.
